PROJECTS

PDF Reader, Mobile application(android)
It is a mobile application developed using android tools. With this app PDF can be read from a device

Rent A Car ,Web application
It is a car rental website. A user can rent car from this website. I use Asp.net language to build the project. for database I use SQL management

Metal Detector, Peripheral project
It is a hardware project which can detect metal using sensor

On Stop cat care
It is a website where a user can buy cat and cat food .also a user can know about cat details and different type of cat deseases

Department Management System
It is one of my personal project where I use C language to build the entire project.
The purpose of the project is to create a database for all kind of departmental information of any university department. I created this for my own department at my university to gather Experience.

INTERESTS

Competitive Programming, Contest Programming, Machine Learning, Artificial Intellegence
